## The mountain never stops.

A 24/7 game where players watch skiers and snowboarders through POV, drone, slope-side and CCTV cameras, predicting how many will hit the tracking zones - over, under, range or exact.

### Betting Options

Betting options and target numbers are shown in the overlay.

**Under**  
Fewer than the target number  
**3x**  
Win Chance 30%

**Over**  
More than the target number  
**3.6x**  
Win Chance 25%

**Range**  
Within a specific range  
**2.25x**  
Win Chance 40%

**Exact**  
2 numbers shown - win if count matches either.  
**18x**  
Win Chance 5%

### Real Footage, Real Mountains

- Pre-recorded footage from ski slopes across multiple camera angles - GoPro POV, aerial drones, and slope-side static cams. Every round is a unique segment from one of our many locations.
- Our AI scans every frame. Arc filling = tracking. Green flash = counted.

### Fairness & Automation

Counting is fully automated using computer vision. No human interference - the detection model determines the final count.

*Bets are settled based on the automated count. The detection system may occasionally miss or miscount skiers — the final count shown is what determines the outcome.*
